Data Analyst with practical hands-on experience in data analysis, Business Intelligence, and Machine Learning. Particularly passionate about exploring underlying data structures, uncovering patterns and insights, and translating them into actionable information to drive data-informed decision-making. My background in technical training and user support equips my technical profile with strong communication skills, an acute understanding of user needs, and proven teamwork capabilities. Seeking to grow my career in Data Analytics and deliver value at the intersection of data, business, and human experience.
